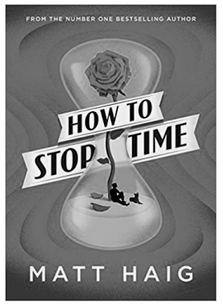
"IT IS STRANGE HOW CLOSE THE PAST IS, EVEN WHEN YOU IMAGINE IT TO BE SO FAR AWAY. STRANGE HOW IT CAN JUST JUMP OUT OF A SENTENCE AND HIT YOU. STRANGE HOW EVERY OBJECT OR WORD CAN HOUSE A GHOST."p.180



Since the last edition, the editing team at Timebubble Chronicle have enjoyed reading Matt Haig's latest book 'How to Stop Time'. Soon to be made into a major film starring Benedict Cumberbatch. A romantic read with a twist - a real page turner!

"...THE WAY YOU STOP TIME IS BY STOPPING BEING RULED BY IT." p325

TIMEBUBBLE TOYS
The Online Toy & Gift Shop

Historically themed wooden construction kits, games & toys for all ages. Inspired by Time Travelling Adventures. Kits are quick & easy to build.

PROUD SPONSORS OF THE TIMEBUBBLE CHRONICLE

6 Day Excursion Through Time c.2580, 2576, 2574, 2569, 2565 & 2562BC.

TOMPSON'S TIME TRAVEL AGENCY

This season's excursion will be a series of 6 revealing time-leaps to key construction moments during the building of the 146.6m high Great Pyramid. We know today that the fine white limestone base, measuring 230m is a perfect square & that from one side to the other varies by only 21mm! See first hand how the ancient Egyptians achieved this, something that baffles contemporary engineers to this day!

CW'S MONTHLY - 'SPOT THE TIME TRAVELLER'
Having trouble? The award this issue goes to Jane Ludlow far left! 'I laugh when I tell my friends my first ride on a camel was in 1926!' Only the best costumes will do, learn to blend in with period accurate clothing and accessories. Visit us at: www.costumewardrobe.com

HOPKIN'S GARAGE

FULL SERVICING & MOTs

Running Formula 8? Don't forget you'll need to upgrade your TTE engine with an adjustable surger plate to allow you to control the frequency of oscillation.

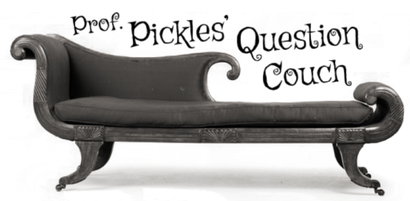
HADDAD'S 1926 PITSTOP

Taking a pit-stop on your time leap back to Ancient Egypt? TBC recommends the use of Haddad's furnishings shop (Galeries D'Ameublement) A safe-house for Timetravellers offering safe board, costume, BubbleJuice™ fuel, general supplies & guides.



'MY QUESTION TO THE PROFESSOR'

Previous Issue -

'Could the bubbles in Guinness be the answer to travelling forward in TIME?'

Dan Bertlitz

Dear Berlitz, thank you for your question. For clarity to our readers, you are quite correct in linking bubbles with the passage of time. Bubbles in liquids are created through the addition of pressurize gas, such as Co_2 which is a relatively stable gas that dissolves more readily in water to create carbonated drinks, such as Diet Coke. Guinness instead is pressurised with 29mol% Co_2 and 71mol% nitrogen. Over time, 'bubble concentration' builds as 'bubble nucleation' gets underway and the surger is engaged. The bubbles accelerate as equilibrium is re-established (Henry's law) due to the pressurized container being opened to the atmosphere. Formula 8 uses surfactant coatings and fine hollow fibres (excellent for trapping gas) to create enhanced nucleation sites within the BubbleJuice™. We measure time in seconds whereas the Theseus Thread Encapsulator measures time in bubbles. This has been the misconception clouding our understanding of time travel, until now...we have simply been using the wrong form of measurement. The more bubbles the further back in time it is able to calculate and so the need for more bubble nucleation. Formula 8 allows us to go back further than we've ever been before.

As for your question Berlitz, I am assuming you are referring to the fact that bubbles rise in carbonated drinks, but sink in Guinness. Research is well under-way to understand the effect of reversing the direction of bubbles through a TTE engine, but as yet there has been no breakthrough. The question is should we? Now that the cat is out the bag... can we reverse human nature?

'MY QUESTION TO THE PROFESSOR'

"A big question! - What do you think the impact of Time-travel will have on mankind? *Rory Whitaker*
